Hypercom® 35-Key T7 Plus Terminal

The Hypercom® 35-Key T7 Plus is a multifunctional credit card terminal that combines the utility and performance you need with the simplicity you desire. The Hypercom 35-Key T7 Plus is capable of processing all major credit cards and can be combined with an external PIN-Pad to accept debit transactions, making it a complete transaction solution.

A Versatile Payment Solution

The 35-Key T7 Plus supports a robust Lodging application and is the ideal terminal for restaurants with easy to use tip-line and tip-adjust functions. The T7 Plus is also ready to process Electronic Benefits Transfer (EBT) transactions, the mandatory method for the distribution of cash benefits and food stamps and its high speed modem enables you to complete all transactions in seconds.

High-speed Thermal Printer

The T7 Plus has a revolutionary SureLoad™ printer. This high-speed thermal printer simplifies paper loading and allows you to drop the roll in place without feeding through slots and rollers. It also supports longer paper rolls for fewer paper changes and its see-through paper holder alerts cashiers to low paper conditions before running out of paper in the middle of transactions.

Simple Interface

The T7 Plus has an innovative key pad which makes it one of the easiest terminals to operate. Instead of relying on function keys and key combinations, the T7 Plus has buttons that are specifically dedicated to performing simple operations. Settling, refunding and voiding transactions can be completed with the push of a single button!

Add a Hypercom T7 Plus to Your Business Free of Charge!

The T7 Plus is ideal for merchants looking for the perfect combination of utility and simplicity and you can add this solution to your business at no cost. Contact United Bank Card today and add a free Hypercom T7Plus to your business.
